Into Bug Valley..... crashes after the first ~20 minutes- fixing cache doesn't help. Waste of money..... Great sound effects.. This game is adorable, educational, and technically brilliant in so many ways! I came to this game while researching Flight AI pathfinding for the unreal engine, as the developer has made his AI available on the UE4 marketplace.

The lifecycles of all the creatures are lovingly recreated , almost as a series of minigames which differ from creature to creature. I hopped around as a grasshopper, i did a butterfly mating dance across the sky, i grubbed around as an ant participating in symbiotic activities with other critters. IT SO CUUUUTE!

Its so much fun to look around and see the whole ecosystem going on around you - a brilliant application of simulation. This is so obviously a work of love - there are so many features, tweaks and different ways to explore the content like multiple game modes, a sandbox mode etc - even the soundtracks each have at least a page of description. The obvious enthusiasm for lil critters shows thoroughly in every aspect of this game, and i wish the creator all the success in the world. I hope to see this game become more polished and expanded, and hopefully more successful on steam. This thing should be part of school curriculums across the world.. So. Many. Cut. Scenes. If you are looking for a "movie" which you play a small part in between cut scenes this is the game for you. Also - be prepared to 'advance' or hold a position which is purely based on time not body count. In just about every other FPS, you enter a room\area, there are 10 baddies, kill them, job done. In COD WW2, be prepared, if you are an accurate shot, to slaughter hundreds of enemies at a time before the game says "Ok, that is enough, we can advance to the next over dramatic war movie cliche cut scene" Graphically the game is stunning but not enough to hold your interest for more than 30 minutes at a time.. Nibba this game finna cop in some serious illnesses, it's so sick nibba. I made a rap about this mutha. "Turbo pug. Turbo pug. Best when you takin your wine and goin glug glug glug. Turbo pug. Turbo pug. It got a dank soundtrack, it's muh plug plug plug." I'm finna buy the soundtrack if they put it up for sale nibba, that♥♥♥♥♥♥the dankie in the world hot dog.. Wonderful game. It has plenty of content and the gameplay is very enjoyable. It is also challenging at some points.

VERY DIFFICULT, only for hard core total war players. Help 3 girls paint then have sex. I can recomend this game. I like farming and I like city building.. good indie game, has a lot of pertential. 6V10. was hoping for oh so much more.. This is a great retro game. It is true that the key provided by Steam will not work at first. All you need to do is contact Capcom and provide them with the purchase email sent to you by steam and the CD key. They'll fix it within 24 hours. It is actually very easy. All you need to do is go to <http://shop.capcom.com/store/capcomus/html/pbPage.capcom-support> and then click on the "Contact Us" link that is right below the "Select Topic" drop down and "looking for answers" search box somewhat close to the top (not the search box at the top). Then you fill in the boxes. Great game, I would recommend it to anyone.

Build 1.0.1121:

A couple small tweaks:

- There is now set attack/defense order: group standing on a settlement/lair defends first, once it is defeated, the lair/settlement group defends;
- Adjusted sliders for animation speed etc, improved functionality of controlled value;

. Patched cats:

We've heard some troubling news recently. Some of you report that the game is laggy for you or doesn't work at all. We deemed this criticism to be constructive and we instantly jumped to fix the code and patched it with unrivaled fervor.

The three most important fixes include:

- The game now launches in fullscreen mode by default.
- Optimization fixes – the game is now a bit lighter, so it should work better, particularly on slower hardware.
- Fixes for reported bugs and errors.

As of now, everything should work just fine, and if it doesn't... Hit us up and report the errors in our Steam Community forum.

Thanks for your patience and sorry for our screw-ups.
