### About This Game

Meet King Ono, ruler of Square land, beloved by all. That is, apart from his arch enemy Lord Void, who will stop at nothing to dethrone him.

The King lacks any meaningful construction skills so he needs you to build his castles for him, using nothing but the latest in cutting edge building materials including.. wood, stone and ... iron. You had better make them strong and sturdy too, because Void's loyal, cannon wielding minions will do all they can to destroy them, and send your King tumbling down to the cold, hard ground.

Protect the King's gold coins and gunpowder stashes and he will reward you, but if he suffers because of your inadequate castle building skills he'll wuss out and surrender, or even worse.. die, meaning you'll see none of those glorious shiny things.

Oh.. and whatever you do, be sure to keep those gunpowder barrels out of sight from the attackers, or your king will be taking a royal flight.

### Attack Mode

Had enough of the King's high and mighty attitude? Take Lord Voids place and plan the attack on the King's castles yourself, before taking control of his minions and their devastatingly accurate (ish) cannons. Destroy the King's coin chests and you'll steal the contents, provided you make the King surrender or send him to his fate.

### Level Builder

Want to make your own levels? Want to place the king at dizzying heights above a cluster of high explosive gunpowder barrels and create an explosion Michael Bay would be proud of? Use custom level slots to create your very own levels, controlling everything from the type and amount of building materials available, to the amount of cannon ammunition the attackers have.

Great game but camera controls need work. I have to agree with the other reviewer here. Good game but camera controls need to be changed.. The game is great, but it needs a better camera control.

Old review:

"The game's not starts and I get a black screen with ingame mouse.

Fix and you'll get a positive review.". fun lil game, defo worth a look. I've just returned from the Middle Ages and I can confirm this is exactly what it was like. There were bandits with cannons constantly besieging the castle (which always seemed to have the most questionable design choices), and the king had an utterly insufferable laugh. I may have loyally served my lord as a castle engineer, but I cheered when the bandits finally toppled him off his tower. And then I got back into my time machine. The Middle Ages sucked.

HAW HAW HAWV10. Would royally tumble again.
